

CSS ZENGARDEN PROJECT

DESIGN FOR THE WEB

Create a custom design for the CSS ZENGARDEN project by Dave Shea
- <http://www.csszengarden.com>

PROJECT DETAILS

“The CSS Zen Garden is an influential World Wide Web development resource. The goal of the site is to showcase what is possible with CSS-based design. Style sheets contributed by graphic designers from around the world are used to change the visual presentation of a single HTML file, producing hundreds of different designs. Aside from reference to an external CSS file, the HTML markup itself never changes. All visual differences are the result of the CSS (and supporting imagery). The site has been translated into multiple languages.”

(quoted from WIKI)

› create your own visuals and CSS to contribute to the project.

TECHNICAL REQUIREMENTS

- HTML source code not to be changed at all - copied and pasted for use
- visuals create your own graphics as required by your idea
- CSS to be written to design the given HTML page

SUBMISSION

- start date 17/1/07
- deadline 31/1/07
