

ONLINE PORTRAIT PROJECT

DESIGN FOR THE WEB

Using the photo taken in class today (or any other photo you might prefer of yourself) – create a portrait of yourself using various Photoshop techniques. The final image will be displayed as part of this year’s student gallery on the course website and its dimensions will therefore need to meet the criteria below.

CONCEPT

The concept for this portrait is entirely up to you – the only restriction is for your face to be clearly recognisable within the portrait. Be creative and show your visual style. Feel free to use any technique you like, the idea is to give your name online a friendly face.

TECHNICAL REQUIREMENTS

- size 150px x 100px
- colour RGB
- resolution (PSD file) 150 dpi

SUBMISSION

in a folder labelled with your name and the word “portrait”:

1. the original photo
2. working file
(layered file in original format of the application you are using, ie for Photoshop: .psd, for Illsutrator: .ai)
3. image optimised for web

- start date 9/10/09
- deadline 16/10/09
